

## Product Information

### Cycle Life of Classic EnerSol T Cells

Based on additional test results and experience, the cycle life of Classic EnerSol T cells has been upgraded to 2000 cycles at 60% depth of discharge (reference: 80% remaining C<sub>10</sub> capacity, 20°C).

Classic EnerSol T cells provide a compact and cost efficient energy solution with low maintenance needs, ideal for small solar and wind power systems. For more details on this range please review the Classic Solar brochure, page 6-7.
